

Arnav Dashaputra

Princeton, New Jersey • arnav.dashaputra@gmail.com

Portfolio: dashaputra.net • LinkedIn: linkedin.com/in/dashaputra • GitHub: [ArnavD74](https://github.com/ArnavD74)

CS graduate with hands-on experience in full-stack development, cloud infra, AI/ML, and data-driven solutions; adept at turning business needs into results-focused applications and highly motivated to collaborate on impactful projects.

SKILLS

- **Languages/Frameworks:** React, JavaScript, TypeScript, HTML/CSS, Tanstack, Bootstrap, Node.js, Java/FXML, C#.
- **Data:** Python (pandas, scikit-learn, seaborn, OpenCV, BeautifulSoup, Streamlit, Selenium), R, DynamoDB, Tableau.
- **Other:** REST APIs, AWS Microservices, OpenAI API, Android, Unix/Bash, Regex, ASM, LaTeX, Git, CI/CD, IaC, Figma.

PROFESSIONAL EXPERIENCE

Software Engineer

Stealth AI Health-tech Startup

Middletown, DE

March 2025 – Present

- Shipped enterprise-ready React MVPs and POCs used in C-suite demos at national healthcare payers to accelerate buy-in and secure pilot commitments. Stack includes React Router/Hooks, and AWS Cognito/Amplify/CodePipeline.
- Architected cloud-native healthcare infrastructure (HL7 FHIR) on AWS using Docker, EC2, Lambda, and RDS/SQL.
- Developed and maintained production React applications in collaboration with UI/UX design agencies using Figma.
- Deployed client-facing landing pages and API-driven utils and dashboards incorporating robust state management.

Freelance Solutions Architect

Multiple Clients (incl. *Got Users LLC, PHILLIPVN LLC, and more*)

New York, NY

April 2025 – Present

- Built an end-to-end text analytics platform using OpenAI embedding-based semantic retrieval, interpretable ML modeling, and k-means clustering (FAISS) to analyze text mediums, extract features, and generate style guidelines.
- Engineered ML pipeline for text normalization, embedding computation, and readability analysis; used cosine-similarity semantic search and Gemini-based content synthesis for polishing drafts based on generated guidelines.
- Architected a serverless SaaS platform using React, integrating AWS Cognito authentication, API Gateway with JWTs, Lambdas (python, boto3), DynamoDB, EventBridge scheduling, and IaC with SAM and CloudFormation.
- Integrated Stripe Checkout and Billing Portal APIs with webhook processing via Lambda for updating user states in DynamoDB; implemented least-privilege IAM, CORS/security hardening, and scripted deployments (Git, CI/CD).

Center Director

Code Ninjas (*Bridgewater, Green Brook, and Hillsborough, NJ*)

Bridgewater, NJ

October 2020 – Present

- Hired and trained over 60 employees and interns; held workshops to improve teaching and leadership qualities.
- Improved customer registrations by 70% through authoring innovative programming curricula (Scratch, JavaScript, Unity/C#) for over 500 students, held during 36 week-long camp sessions across three separate branch locations.

Computer Labs Consultant

Rutgers University Office of Information Technology

Piscataway, NJ

April 2022 – December 2024

- Diagnosed an average of 50 technical issues per week using ServiceNow workflows, OpenRegistry and similar internal IDMS, PaperCut and Icinga for device management, and SecureW2 for network authentication and security.
- Reduced average resolution turnaround times by 20% through proactive system monitoring, efficient and speedy troubleshooting, and effective prioritization; leveraged ServiceNow with Slack for rapid support coordination.

Vice President of Communications

Sigma Phi Epsilon, NJ Beta (*Rutgers University*)

New Brunswick, NJ

October 2023 – November 2024

- Boosted online presence with an 18% rise in Instagram engagement and 10% website growth, leading chapter-wide comms strategies and earning the National *Benjamin Hobson-Fraser Award for Excellence in Communications*.

INDEPENDENT PROJECTS (files available on GitHub)

Numeric Digit Identification using K-Means Clustering (*Python, scikit-learn, pandas*)

- Built end-to-end preprocessing pipeline (imputation/encoding/scaling) and implemented K-Means tuned with elbow & silhouette, then produced EDA and cluster-profile summaries to identify distorted digits from a 2D canvas.

Tangerine — Discord automation and moderation tool (*Node.js, Express, MongoDB*)

- Built and operated a real-time Discord service for advanced moderation and growth utilities; deployed on Heroku with horizontal scaling and instrumentation, at peak supporting **250K+ daily users** across 500+ unique servers.

False Discovery Rate (FDR) Gene Analysis (*Python/R*)

- Ran hypothesis tests on NCI60 gene expressions, applied FDR correction to identify statistically significant markers.

EDUCATION

Rutgers, The State University of New Jersey

New Brunswick, NJ

- **Bachelor's degree: Computer Science;** Minor: Data Science

September 2021 – December 2024
