Arnav Dashaputra

Princeton, New Jersey • arnav.dashaputra@gmail.com

Portfolio: dashaputra.net • LinkedIn: linkedin.com/in/dashaputra • GitHub: ArnavD74

CS graduate with hands-on experience in full-stack development, cloud infrastructure, and data-driven solutions; adept at turning business needs into strong results-focused applications and highly motivated to deliver impactful projects.

SKILLS

- **Data:** Python (pandas, scikit-learn, seaborn, OpenCV, BeautifulSoup, Streamlit, Selenium), R, DynamoDB, Tableau.
- **Languages/Frameworks:** Java/FXML, HTML/CSS, JavaScript, React, Tanstack, Node, Bootstrap, jQuery, Express, C#.
- **Other:** AWS, Android SDK, Bash, Regex, ASM, Heroku, LaTeX, GitHub, Figma, MS365, Adobe CC, Google Analytics, SEO.

PROFESSIONAL EXPERIENCE

Software Engineer — Remote — Middletown, DE
Stealth AI Health-tech Startup — March 2025 – Present

- Engineered cloud-native healthcare infrastructure on AWS: deployed Dockerized Java services on EC2, migrated data persistence to RDS/PostgreSQL, and optimized provisioning and scalability for reliable, efficient operation.
- Built and maintained production React applications, collaborating with UI/UX designers (Figma, Photoshop): shipped a complete user-facing landing page and an API-driven health dashboard with robust state management.
- Automated backend workflows with custom Python scripts for bulk data ingress and static resource generation.

Freelance Solutions Architect — Remote — New York, NY
Your Highest Self — April 2025 – Present

- Architected and shipped a serverless SaaS end-to-end: React SPA, AWS Cognito (custom auth triggers + Pinpoint), API Gateway with JWT authorizer fronting Python Lambdas, DynamoDB (users, storage, OTPs), EventBridge for scheduled dispatch, AI content via Gemini, IaC with AWS SAM/CloudFormation, Secrets Manager, and CloudWatch.
- Integrated Stripe Checkout and Billing Portal with webhook processing via Lambda to keep subscription and user state in DynamoDB; implemented least-privilege IAM, CORS/security hardening, and scripted deployments (CI/CD).

Center Director — Bridgewater, NJ
Code Ninjas *(Bridgewater, Green Brook, and Hillsborough, NJ)* — October 2020 – Present

- Hired and trained over 60 employees and interns; held workshops to improve teaching and leadership qualities.
- Improved customer registrations by 70% through authoring innovative programming curricula (Scratch, JavaScript, Unity/C#) for over 500 students, held during 36 week-long camp sessions across three separate branch locations.
- Increased web traffic by 40% and enrollments by 20% by developing the business's website and enhancing SEO through keyword optimization, performance tuning, A/B testing, and data-driven insights from Google Analytics.

Computer Labs Consultant — Piscataway, NJ
Rutgers University Office of Information Technology — April 2022 – December 2024

- Diagnosed an average of 50 technical issues per week using ServiceNow workflows, OpenRegistry and similar internal IDMS, PaperCut and Icinga for device management, and SecureW2 for network authentication and security.
- Reduced average resolution turnaround times by 20% through proactive system monitoring, efficient and speedy troubleshooting, and effective prioritization; leveraged ServiceNow with Slack for rapid support coordination.

Vice President of Communications — New Brunswick, NJ
Sigma Phi Epsilon, NJ Beta *(Rutgers University)* — October 2023 – November 2024

- Boosted online presence with an 18% rise in Instagram engagement and 10% website growth, leading chapter-wide communications strategies and earning the *Benjamin Hobson-Frayser Award for Excellence in Communications.*

INDEPENDENT PROJECTS (files available on GitHub)

K-Means Clustering and Data Preprocessing *(Python, scikit-learn, pandas)*

- Built end-to-end preprocessing (imputation, encoding, scaling) and implemented K-Means; tuned *k* with elbow & silhouette scores, then produced EDA and cluster-profile summaries with clear narratives to guide interpretation.

Tangerine — Discord automation and moderation tool *(Node.js, Express, MongooseDB)*

- Built and operated a real-time Discord service for advanced moderation and growth utilities; deployed on Heroku with horizontal scaling and instrumentation, at peak supporting **250K+ daily users** across 500+ unique servers.

FDR Gene Analysis *(Python/R)*

- Ran large-scale hypothesis tests on NCI60 gene expression, applied false-discovery-rate correction to identify statistically significant genes, generated QQ/volcano plots for significance, and summarized biological relevance.

EDUCATION

Rutgers, The State University of New Jersey — New Brunswick, NJ

- **Bachelor's degree: Computer Science**, Minor: Data Science — September 2021 – December 2024
